

## SJZ series conical double screw extruder

### Main Features:

- 1.High output, and good plasticizing
- 2.If you need put **more additives in your formula, such as calcium**, we need to use dedicated designed screw as per your formula, the special screw can help you save cost in your final products and make better quality products.
- 3.Screw and barrel are mad by **bi-metallic** construction which has longer service life.
- 4.Use Siemens motor and electric parts can improve extruder' s working stability.
